

Save money on your lab tests!

Insureds and their eligible dependents can receive outpatient laboratory testing at no charge to them*! This translates into dollars saved for policyholders.

LabOne is a fully accredited and certified laboratory in Lenexa, in the Kansas City, Kansas area. **LabOne** offers significant savings over other labs, because of the sheer volume of tests they perform — reducing costs for everyone. **LabOne** allows insureds to pay nothing for covered outpatient laboratory testing, without reducing quality or limiting choice.

How Does it Work?

The savings available through **LabOne** are not automatic. **LabOne** members need to make sure that they show their physician's office their **LabOne** card and request that their specimens be sent to **LabOne** for testing.

The physician's office follows the simple instructions on the back of the **LabOne** card. Specimens are collected and sent to **LabOne**. They perform the tests and send the results to the physician (usually within 24 hours). *IT'S THAT SIMPLE!*

If the doctor's office is unable to collect the specimens, the patient can call **LabOne** at **1-800-646-7788** to locate an approved collection site in the area.

Use the **LabOne** card and pay less at the doctor's office for covered outpatient lab tests. Ceres Group has made it that easy for you to save!

* This program is automatically available to all plans with deductibles of \$1,000 or less. If the insured chooses not to use the **LabOne** card, standard policy benefits apply.
