

Introducing UnitedHealthcare's Standard Vision Program

UnitedHealthcare's Standard Vision Program is part of your medical plan and includes vision exam services as well as savings on eyeglass frames, lenses and contact lenses.

FOCUS ON VALUE

Eyeglass frames and lenses are an investment in better vision. In a retail environment, different vision care providers may charge different prices for the same frames and lenses, making it difficult for you to determine the cost or quality of the product. Because we contract directly with providers, frame suppliers and lens laboratories, we are able to manage the costs and quality of frames, lenses and contact lenses, adding continuity and consistency to our Vision Program.

FOCUS ON QUALITY

All network providers participate in a credentialing process prior to being accepted into the network. This program includes review of the following elements:

- ⇒ Education, training and experience
- ⇒ Licensure, certification, and other regulatory considerations
- ⇒ Malpractice actions

We also have a Quality Review Committee responsible for establishing and maintaining effective review programs, including provider office and medical records reviews.

Lens laboratories are also contracted to adhere to quality standards.

FEATURES

- ⇒ Vision exam copayment remains the same
- ⇒ Savings on a selection of brand-name frames, lenses and lens options

- ⇒ A network of credentialed vision care providers, including optometrists, ophthalmologists and optical stores
- ⇒ 24-hour access to benefit information through our Web site, www.myuhc.com, and our toll-free automated information line, (877) 532-9300
- ⇒ No claim forms

QUALITY AND AFFORDABILITY

You receive the best savings and value from your vision care program when you choose frames from our Coordinated CollectionTM. It includes a selection of 200 brand-name frames provided by three of the world's leading suppliers, with popular styles for the whole family. Frames are divided into two price categories: Quality Series (\$120 retail market value) and Elite Series (\$160 retail market value).

Eyeglass lenses are provided by quality-assured labs, with superior turnaround times. Ask your vision care provider about savings on technologically advanced lens materials and options, including progressives, anti-reflective and UV coatings, tints and more.

PROTECT YOUR EYES AND HEALTH

Vision exams are an important wellness benefit even for people who don't have vision problems. Early signs of potential health concerns, such as diabetes and high blood pressure, often appear first in the eyes. A vision exam can also detect medical eye problems, such as glaucoma, in the beginning stages. And early detection can lead to treatment that may prevent more serious health problems or loss of vision.

So protect your eyes and your health – schedule your vision exam today!

EASY TO USE

Simply choose a provider from our vision care network, and call to schedule your appointment. For information about vision provider locations, call Member Services at the number listed on your ID card, call our automated information line, or visit our Web site. Please have your ID card available when scheduling your appointment, and bring it with you the day of your exam.

MEMBER SERVICES

We want to make sure you receive all the advantages of your vision care program. If you have any questions about this program, please call our Member Services Department at the number listed on your ID card.

We look forward to serving you.
